Houda Jaoudar

Python | Artificial Intelligence | Aspiring Software Engineering Co-op Student hjaou084@uottawa.ca
Gatineau, Quebec linkedin.com/in/houda-jaoudar-436804389 | github.com/houdajaoudar

SUMMARY OF QUALIFICATIONS

- First-year co-op student in the Bachelor of Applied Science in Software Engineering at the University of Ottawa; graduate in Computer Engineering Technology with a 3.95/4.0 GPA
- Designed and developed the back end of a children's storytelling application powered by 5 artificial intelligence agents (Python, FastAPI, MongoDB, AWS)
- Hands-on experience with embedded C/C++ programming, Linux, MySQL, Raspberry Pi, computer vision and software testing, gained at Collège La Cité
- Over two years of customer service experience, including supporting credit card holders at CIBC in a confidential environment
- Proficient in Microsoft Office Suite (Word, Excel, PowerPoint, Outlook)
- Bilingual (French and English)

EDUCATION

Bachelor of Applied Science in Software Engineering (Co-op) September 2026 – Present
University of Ottawa, Ottawa, Ontario

- Expected graduation: April 2030
- Relevant courses: Python programming, Calculus I, French for engineers
- Participant in the Match-Up program of the University of Ottawa Entrepreneurship Hub
- Selected to attend the Canadian Celebration of Women in Computing (Can-CWiC), University of Waterloo, November 2026, sponsored by the University of Ottawa

Ontario College Advanced Diploma in Computer Engineering Technology September 2023 – April 2026
Collège La Cité, Ottawa, Ontario

- Cumulative GPA: 3.95/4.0
- Relevant courses: embedded C/C++ programming, Linux systems, MySQL databases, computer vision, software testing, Internet of Things
- Capstone project: TinyTales, an AI-generated children's story application, presented to a jury

SKILLS

Software Development and Artificial Intelligence

- Developed a Python application programming interface with FastAPI and documented it with Swagger for the TinyTales project
- Secured application authentication: password hashing (Argon2), access tokens, email verification and password reset
- Combined several artificial intelligence services (Claude on AWS Bedrock, ElevenLabs, AWS Polly, FLUX.1) to generate text, voice and images
- Programmed a Raspberry Pi and transmitted data wirelessly at low power using LoRa technology

Technical Knowledge

- **Programming languages:** Python, C, C++, SQL

- **Frameworks and libraries:** FastAPI, Pydantic, OpenCV
- **Databases:** MySQL, MongoDB (MongoDB Atlas)
- **Cloud and artificial intelligence:** AWS (Bedrock, Polly), Anthropic API, ElevenLabs, Hugging Face
- **Systems and tools:** Linux, Windows, Git, GitHub, Raspberry Pi, LoRa

Communication and Customer Service

- Explained financial and technical information clearly to clients over the phone, in French and English
- Presented the TinyTales project to a jury during the capstone defence at Collège La Cité
- Protected personal and financial information by following strict security and confidentiality standards

PROJECTS

TinyTales – AI-Powered Children's Storytelling Application Collège La Cité

- Designed and developed the back end of a mobile application that turns a child's photo or voice into an illustrated, narrated story using 5 artificial intelligence agents
- Adapted each story to the child's age (length, vocabulary, structure) and offered it in 4 languages: French, English, Spanish and Arabic
- Implemented fallback providers for text, voice and images so a story is still generated when an artificial intelligence provider is unavailable
- Produced multi-voice narration synchronized word by word with the story text
- Modelled data in MongoDB (users, child profiles, favourites) and built 12 endpoints for the mobile application
- Source code and documentation: github.com/houdajaoudar/tinytales-backend

Fire Detection Prototype – Raspberry Pi and LoRa Collège La Cité

- Designed a prototype that detects a fire and sends an immediate notification upon detection
- Selected LoRa technology for its low power consumption, long range and low cost, making the system economical and efficient

WORK EXPERIENCE

Customer Service Representative 2020 – 2022
CIBC – Costco Mastercard, Montreal, Quebec (Remote)

- Assisted credit card holders with billing inquiries, transaction disputes, account updates and payment arrangements
- Applied fraud prevention measures, activated cards and adjusted credit limits while complying with security and confidentiality standards
- Escalated complex cases to specialized departments to ensure timely and accurate resolution
- Met or exceeded performance targets for call handling time, accuracy and customer satisfaction

Customer Service Specialist (Part-time) October 2020 – October 2021
Hudson's Bay Company, Montreal, Quebec

- Processed customer payments accurately at the cash register in a busy retail environment
- Welcomed and advised in-store customers, answering their questions with courtesy and efficiency
- Resolved customer requests and issues in collaboration with the store team
